

Botox®

It is a non-surgical procedure that smoothes out frown lines, creases in the forehead,

lines near the eyes and mouth to give a skin more youthful look. Receiving Botox® is

easy and the process usually takes about 15 minutes. Results begin to show within days.

Botox® is a painless procedure and does not require any downtime. The results usually

last 3-6 months. The side effects are minimal. The most typical are localized bruising/swelling

and nausea.
