

# Thyroid Disease

When your thyroid is not balanced properly, you can feel very uncomfortable. If you found yourself answering “yes” to any questions below, please check your thyroid.

Are you experiencing any of these symptoms:

- Poor memory and concentration
- Depression
- Nervousness, anxiety, tremors
- Heavy or very light menstrual periods
- Weakness and fatigue
- Dry or coarse skin
- Heat/cold intolerance
- Hair loss
- Unexplained weight gain/loss
- Insomnia
- Constipation/diarrhea

In our office we offer cutting edge technology tests that will give you a full picture of your Thyroid.

Our treatment is also different from conventional medicine treatment. We give you choices of natural thyroid hormone, homeopathy, nutritional supplements. We also include thyroid-friendly nutrition.
